

CUSTOM DESIGNED AUDIO CABLES
MORE MUSIC FROM THE GROOVE TO YOU

WyWires specializes in custom-made audio cables for audiophiles, recording and mastering facilities, and home entertainment systems.

We offer an exclusive, handcrafted product that is customized for every user's system.

Sonic performance attributes include:

Enhanced inner detail

Totally silent background between notes

State of the art realism, especially vocals

Greatly expanded soundstage in all dimensions

The most natural rendering of tone, timbre, attack and decay

State of the art definition and resolution of complex passages

Excellent and extended low-frequency performance

Virtual elimination of irritation or listening fatigue

Lifelike scale of instruments

Sibilance (sss) elimination

CUSTOM DESIGNED AUDIO CABLES
MORE MUSIC FROM THE GROOVE TO YOU

More music from the groove to you, our mission and our passion. We want you to get the most out of the music you love, whether you get your tunes in vinyl, downloads, or CD/SACD/DVD formats.

WyWires develops audio cables that correct deficiencies in your system. All WyWires products produce natural textures with strong leading edges, while at the same time we take away the grungy, metallic annoyances.

WyWires are made entirely by hand, in our facility in Los Angeles. We conduct consultations (and offer the same service to our dealers) so that each cable is specified correctly for each customer's system. Designer and founder Alex Sventitsky personally oversees all manufacturing to ensure quality is kept at the highest levels.

Our standards in sourcing and manufacturing our premium cables are high. We have our own wire formulae, based on 10 years of research and practical experience. We do not buy pre-fabricated wire; we use Litz wire, specifically designed by WyWires and made in the USA. All of our materials are sourced in North America and Europe.

Cables are tested and burned in before shipping. We offer a 30-day money-back guarantee to our customers. All WyWires products are warranted for 5 years against manufacturing defects.
